## How Much Wood is in a Cord?

A full cord of cordwood, split or unsplit and stacked should measure 4 feet deep by 4 feet high by 8 feet long.

A face cord of cordwood, split or unsplit and stacked should measure 4 feet high by 8 feet long

This can lead to some confusion depending on the length of the logs and the following diagrams will show what you can expect to get when ordering wood by the cord and the length.

 **Full Cord. Logs 12 inches long.**  
4 x 8 units 4 times.

 **Logs 16 inches long.**  
4 x 8 units 3 times.

 **Logs 18 inches long.**  
4 x 8 units 2.7 times.

 **Logs 20 inches long.**  
4 x 8 units 2.4 times.

 **Logs 24 inches long.**  
4 x 8 units 2 times.

 **Face Cord.**  
A face cord measures 4 feet x 8 feet regardless of the length of the logs.

## Types of Wood

 **BEECHWOOD** logs burn bright and clear  
If the logs are kept a year.

 **CHESTNUT's** only good, they say  
If for long it's laid away.

 **BIRCH** and  **FIR** logs burn too fast  
Blaze up bright and do not last.

 **ELM** wood burns like a church yard mold  
Even the very flames are cold.

 **POPLAR** gives a bitter smoke  
Fills your eyes and makes you choke.

 **APPLE** wood will scent your room  
With an incense like perfume.

 **OAK** and  **MAPLE** if dry and old  
Keep away the winter cold.

 But **ASH** wood wet and **ASH** wood dry a  
king shall warm his sippers by.
